LockMyCrypto (LMCX) - One-Pager

The First Behavioral Crypto Locking Protocol

Decentralized | Non-Custodial | On-Chain

About LMCX

LockMyCrypto (LMCX) lets traders, investors, and even whole projects lock crypto by time or by price - a behavioral tool that reduces impulsive selling and protects long-term gains. All locks are 100% on-chain.

Powered by LMCX Token

* Each lock pays a small LMCX fee.
* Fees support protocol growth and future reward programs for lock milestones.
* LP and team tokens will be locked to build trust from day one.

Key Features & Future Vision

* Launch support: first for EVM tokens (ETH & sub-tokens), then stablecoins, and later native assets (BTC, XRP, SOL).
* Goal: lock almost any token - maximizing supported assets across chains.
* Designed to become a simple few-click platform for everyone: from retail users to projects locking LP & team tokens.
* Planned features: burn engine, advanced stats dashboard, and decentralized escrow (with future AI-assisted dispute resolution).
* Follow us for updates as the roadmap evolves.

Tokenomics (1B LMCX)

* Fairlaunch - 50%
* Team (Vested) - 15%
* Core Development - 14%
* UX/UI & Protocol Analytics - 4%
* Marketing & Promotions - 10%
* CEX & Expansion - 4%
* Community Incentives - 3%

Fairlaunch

* Platform: GemPad.app | Chain: BNB Smart Chain
* Target: Q4 2025 | Contract: 0x1C7DF7db5a205fE3749838d9Df299f121C2FDC5f

Roadmap Highlights

* Q4 2025: Fairlaunch live, LP & team-token locks.
* Q1 2026: Dashboard + basic lock engine online (EVM tokens first).
* Later 2026: Support for stablecoins -> native assets, burn-engine rollout, escrow beta.
